REPORTING PRACTICE SUMMARY – 2024

Sweden's reporting practice changed in 2024.

Sweden reported **Actual Numbers** and classified **Values** for most major conventional arms exports, as opposed to 2023, when it reported **Numbers**.

Sweden reported classified **Numbers** and **Values** of **Actual** light weapons exports. In 2023, Sweden reported classified **Numbers**, without indicating whether the transfers were **Actual** or **Authorized**.

Sweden reported classified **Numbers** of **Actual** imports of major conventional arms, as well as **Actual Numbers** of small arms imports.

GOOD PRACTICES

Sweden specified for which categories and sub-categories of arms information was withheld for 'commercial sensitivity/national security-related' reasons (numbers and values of exports of MANPADS, recoilless rifles and portable anti-tank missile launchers and rocket systems; values of exports of armoured combat vehicles, large-calibre artillery systems, and manned combat aircraft; numbers of imports of missiles and missile launchers).

Sweden indicated clearly there were no reported exports and imports in specific categories and sub-categories of arms.

Sweden provided descriptions for all reported exports.

ROOM FOR IMPROVEMENT

Sweden aggregated the recipients of light weapons exports, making it impossible to determine how many items were delivered to each country.

Sweden could provide descriptions and comments for all reported transfers.

TRANSFER SUMMARY – 2024: EXPORT DATA

- Sweden reported exports to 13 countries. Of these, ten were ATT States Parties, two were Signatories and one was a non-State Party (India).
- Sweden reported the export of 20 major conventional arms. These were large-calibre artillery systems (50.0 per cent), armoured combat vehicles (45.0 per cent) and manned combat aircraft (5.0 per cent), as well as a classified number of MANPADS.
- The main importers of major conventional arms from Sweden were the United Kingdom (50.0 per cent), the Netherlands (45.0 per cent) and Brazil (5.00 per cent). A classified number of MANPADS were exported to Latvia.
- Sweden also reported the export of a classified number of recoilless rifles, as well as portable anti-tank missile launchers and rocket systems, to an aggregated list of importing States.

TRANSFER SUMMARY – 2024: IMPORT DATA

- Sweden reported imports from one country, which was an ATT State Party.
- Sweden reported the import of a classified number of missiles and MANPADS, and withheld the exporter.
- Sweden reported the import of 7,500 assault rifles from Finland.
