### REPORTING PRACTICE SUMMARY - 2020

Germany's reporting remained the same in its 2020 annual report.

Germany continued to report **Actual Numbers** of major conventional weapons exports and reported **Authorized Numbers** of SALW exports.

As in its 2019 report, Germany did not report imports of major conventional weapons. It continued to report **Authorized Numbers** of SALW imports, apart from three instances: one where an import was reported as an actual transfer and two where it did not specify whether transfers were actual or authorized.

**GOOD PRACTICES**

Germany provided clear, disaggregated data for each reported export and import.

Germany provided comments describing the nature of some of its SALW imports.

**ROOM FOR IMPROVEMENT**

Germany did not specify whether transfers were actual or authorized for some of its imports.

Germany could provide descriptions and comments describing the nature of all reported exports and imports.

Germany could indicate clearly that there were no reported exports or imports in specific weapons categories and sub-categories rather than leaving relevant sections of the reporting template blank.
