REPORTING PRACTICE SUMMARY - 2020

Mexico’s reporting remained the same in its 2020 annual report.

Mexico reported **Actual Numbers** of small arms exports. It did not report exports of major conventional weapons or light weapons.

Mexico reported **Actual Numbers** of major conventional weapons and SALW imports.
Mexico reported imports from 11 countries. Of these, eight were ATT States Parties and three were Signatories.

Mexico reported the import of 1,080 major conventional weapons items, all of which were missiles and missile launchers (MANPADS) from the United States.

Mexico reported the import of 82,775 SALW items, covering five sub-categories. Of these, the majority were revolvers and self-loading pistols (83.5 per cent), rifles and carbines (12.3 per cent) and ‘others’ (small arms) (3.9 per cent), described mostly as shotguns.

In terms of numbers, the main exporters of SALW to Mexico were the United States (80 per cent), Italy (10.8 per cent) and Israel (4.9 per cent).

Mexico provided clear, disaggregated information on its reported exports and imports.

Mexico provided descriptions and comments describing the nature of each reported export and import.

Mexico excluded some data for ‘commercial sensitivity/national security-related’ reasons but did not specify where or how much information was withheld.

Mexico could indicate clearly that there were no reported exports or imports in specific weapons categories and sub-categories rather than leaving relevant sections of the reporting template blank.
